

SQL Basics Practice - Day 2

This document contains basic SQL practice including CREATE DATABASE, CREATE TABLE, INSERT, SELECT, WHERE, ORDER BY, UPDATE, and DELETE queries.

SQL Practice Code

```
-- Create Database
CREATE DATABASE college_db;

-- Use Database
USE college_db;

-- Create Table
CREATE TABLE students (
    id INT PRIMARY KEY,
    name VARCHAR(50),
    city VARCHAR(50)
);

-- Insert Values
INSERT INTO students VALUES
(1, 'Ram', 'Hyderabad'),
(2, 'Sam', 'Delhi'),
(3, 'Ravi', 'Chennai');

-- Display Table
SELECT * FROM students;

-- WHERE Clause
SELECT * FROM students
WHERE city = 'Delhi';

-- ORDER BY
SELECT * FROM students
ORDER BY name ASC;

-- UPDATE
UPDATE students
SET city = 'Mumbai'
WHERE id = 2;

-- Display Updated Table
SELECT * FROM students;

-- DELETE
DELETE FROM students
WHERE id = 3;

-- Final Table
SELECT * FROM students;
```

This practice file helps in understanding basic SQL operations commonly asked in placement preparation and interviews.
